

Placement Cell · AI-Use Policy

Aditya University · Placement Cell | Academic Year 2025–26 | Effective: June 2025

§1 · Student-AI Scenario Risk Classification (EU AI Act Framework)

#	Scenario	Tier	Reasoning
1	AI résumé editing	Limited	Student's substance is theirs; AI polishes language only. Disclosure to recruiters required.
2	AI mock interviews	Minimal	Private practice tool; no recruiter is assessed. Free use, no obligations.
3	AI-written application essays	High-risk	Student's voice is the assessment criterion. Mandatory mentor review + student declaration.
4	AI-coded GitHub portfolio	High-risk	Allowed only with mandatory oral defence — student walks through every accepted line.
5	AI in graded internal assignments	Unacceptable / Limited	Unacceptable where ability is tested; Limited with declaration where application is tested.
6	AI-generated CGPA on résumé	Unacceptable	Falsification of academic record. Banned outright.
7	AI-cloned voice for video interview	Unacceptable	Identity fabrication. Banned outright.
8	AI for skills self-assessment	Minimal	Self-reflection tool; no third party assessed. Free use.

§2 · Permitted Uses

- P1** AI **may** be used to: Rewrite résumé bullets for clarity and grammar (with disclosure to recruiter).
- P2** AI **may** be used to: Simulate mock interviews for personal practice and answer rehearsal.
- P3** AI **may** be used to: Explain technical concepts (DSA, OS, DBMS) in study mode.
- P4** AI **may** be used to: Generate placement-prep study schedules from a provided syllabus.
- P5** AI **may** be used to: Produce one-page company-prep briefs, verified against the company's official website.
- P6** AI **may** be used to: Review and suggest improvements to student-written code, subject to oral defence.

§3 · Prohibited Uses

- X1** AI **may NOT** be used to: Fabricate projects, internships, or experience the student did not actually complete.
Detection: Mentor oral defence — student explains technical decisions and walks through code on résumé.
- X2** AI **may NOT** be used to: Clone the student's voice or likeness for asynchronous video interviews.
Detection: Recruiter confirmation of voice-continuity check; live segment requirement increasingly standard.
- X3** AI **may NOT** be used to: Generate or alter academic records (CGPA, marks, transcripts).
Detection: Cross-reference all CGPA/marks claims with the college academic portal.
- X4** AI **may NOT** be used to: Write SOPs or motivation letters where the student's authentic voice is the assessment criterion.
Detection: Mentor compares with 2–3 historical writing samples to check voice consistency.

§4 · Enforcement

E1 · Random Oral Defences	The placement cell will conduct random oral defences on portfolio projects (20% sample of placed students per cycle).
E2 · Violation Consequences	First violation: written warning + portfolio re-defence within 7 days. Second violation: placement support withdrawn for the current placement cycle.
E3 · Honest Acknowledgement	The placement cell acknowledges that not all violations are detectable. This policy relies in part on student integrity and the broader career consequences of misrepresentation to recruiters.
